

SKYLOTEC Highlights for a safe climbing season 2010

SKYRIDER Via Ferrata Set

The set consists of two innovative components. The SKYTURN connecting element replaces the karabiner on one end of the set, and is automatically secured via a locking mechanism. If a climber falls, SKYTURN has a clamping effect on the steel wire rope, ensuring that the climber remains in position. The second component is a specially designed karabiner made of steel, thereby guaranteeing unique tensile strength and bending load. Thanks to its design, the karabiner provides for ultimate grip. It also features a 31 mm gate opener.

- Prevents falls right up to the fixed point
- Clamp serves as additional fall damper
- Easy handling
- For steel wire ropes from 10,5mm-18 mm
- Specifically designed steel karabiner
- Elastic straps
- Additional shorter arm for resting
- Suitable for children
- Retail price: 149,95 €

SKYSAFE Steel Karabiner

The SKYSAFE karabiner is a truly innovative and unique piece of equipment. For the first time, steel has been used to make a karabiner. Two steel cores move freely against each other when pressure is exerted on the edges, thereby providing a redundant system. Synthetic coating and ergonomic notches ensure that the SKYSAFE has a superb grip, making slipping and sliding almost impossible. In addition, the karabiner features a 31 mm gate opener.

The SKYSAFE's design allows for ergonomic handling to prevent fast fatigue along challenging mountain routes equipped with fixed cables.

- High flexural strength
- No more annoying rope catches on removal of rope
- Innovative closing mechanism
- Extremely wide gate opener (31 mm)
- Lightweight
- Superb grip
- 100% stainless Inox steel
- Complies with EN 362 and EN 12275

Skylotec Climbing Harness SC113 Gym

The Skylotec SC113 Gym has been developed to meet the specific requirements of indoor climbing and rental businesses. The SC113 Gym is easy to use and offers maximum safety.

- Universal adjustment system with flexible hip padding
- Two supporting strap loops with 15 kN breaking strength
- Clear size labelling
- Marked leg loops
- Optimal alignment
- Comfortable fit
- Mesh Skyvent
- Retail price: 59.95 €

SKYLOTEC INDY 9.9 mm – Climbing Rope with Rope Indicator

The INDY with “Rope Indicator” displays a significantly different pattern along the last 5 metres at each end of the rope, reminding the climber to exercise greater caution from this point onwards. In this way, the INDY can prevent dangerous situations or even falls caused by insufficient rope length.

- 9.9 mm
- 63 g / m
- Rope Indicator
- 2Dry finish
- Standard falls 8 / fall-arresting force 9.5
- 5% static strain / 29% dynamic strain
- 50/60/70 m
- For sport climbing, Alpine climbing, high-altitude mountain tours
- Retail price: 199.95 € (60 m)
