

**And the winner is...  
SKYLOTEC on the victory podium**

These words, or words like these, have been the cause of celebration at SKYLOTEC on many occasions in the last few years! The newcomer on the climbing market managed to garner important awards in the sector at both the Outdoor 2008 and 2009 and the ISPO 2009. Which once more goes to prove: innovation and attention to detail pay off!

**SKYFIT SC 111 / 112**

Winner of the **ISPO Brandnew Awards** for Hardware Accessories 2009! Inconvenient and awkward fitting are now a thing of the past, thanks to the SKYFIT system. An elastic band immediately flattens and sits snugly against the body, and the harness need only be pulled tight. The SKYFIT is available in two variants, either with or without leg loops, and is equally suitable for mountaineering and sport climbing.

The SKYFIT SC 111 has even been nominated for the Design Award of the Federal Republic of Germany 2010.

NOMINIERT

**GEKKO SC 101**

The GEKKO is also a real winner! The innovative central anchor point helped the climbing harness for children to collect the **Outdoor Industry Award** 2008. This ensures a maximum degree of safety, preventing the carabiner from slipping sideways. The GEKKO combination harness is ideal for little mountaineers determined to get to the top! Model variants have even been expanded, with a padded version now available for greater wearer comfort!

**SC 103**

The SC 103 is an ergonomically-cut all-round harness ideally suitable for use in halls, mountaineering and performance-orientated sport climbing. The harness design combines a high degree of comfort and optimum freedom of movement.

And it is precisely for these reasons that it is winner of the **Alpin-Tipp** 2009.
